## **CLAIMS**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Lehtiniemi et al. (US 6466299).

Regarding claim 1, Lehtiniemi shows a housing (fig. 1) comprising:

An outer visible surface (C) which is composed of an appearance changing substance (A1-A4) response to a change in a surrounding physical environment (col. 1, lines 58-67).

Regarding claim 7, Lehtiniemi shows a housing (fig. 1) comprising:

An outer visible surface (C) having at least one shape element (see A1-A4) composed of an appearance changing substance (A1-A4) responsive to a change in a surrounding physical environment (col. 1, lines 58-67).

Regarding claims 2-16, Lehtiniemi shows:

The housing (fig. 1);

Application/Control Number: 10/071,938

Art Unit: 2642

Internal components (col. 1, lines 58-67) which generates the change in the surrounding physical environment;

The stimulus is a combination of one or more stimuli selected from a group consisting of an acoustic, a thermal, an electrical, an electromagnetic, an olfactory, and a mechanical stimulus (col. 1, lines 58-67);

At least one resistive element (TLC's), wherein the thermal stimulus is an energizing of the element;

The substance is a combination of one or more substances selected from a group consisting of a color, a pattern, an illumination, a shape, and a sensory changing substance (col. 4, lines 20-58);

The shaped element change appearance in response to the change in the surrounding physical environment (A1-A4);

The shaped element becomes invisible in response to the change in the surrounding physical environment (lines 4-5 in Abstract);

At least one identification information selected from the group consisting of identification data, codes, patterns and images (A1-A4); and

An environment index gauge (A1-A4) which identifies the change in the surrounding physical environment.

Application/Control Number: 10/071,938

Art Unit: 2642

## **ARGUMENT**

- 3. In response to the remarks filed on 08-23-04 (pages 1-6), applicant mainly argues that Laurikka does not anticipate the claimed appearance of the housing changing in response to the change in the surrounding physical environment.

  Laurikka is now withdrawn, no further discussion is made regarding Laurikka.

  Lehtiniemi is cited to address the above issue and the claimed limitations, see rejection above.
- 4. Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2642

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728.

The examiner can normally be reached on Mon.-Fri. from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on 703-305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
